

Finest Mobile Phone Keypad in the World

Delta II™
No Compromise.

Fast, small, simple. Pick three.

- Affirmed by world renowned experts.
- Over 200 users tested: 4 out of 5 prefer Delta II because of its breathtaking speed, simplicity, and comfort.
- Patented slim-QWERTY button layout solves everything that is wrong with today's mobile phone keypads -- it's simple, elegant, and brutally effective. Say goodbye to slow typing, bulky phones, uncertain results, and ridiculously tiny buttons.
- Speed! Speed! New users experience pleasant 20 to 30+ WPM typing speeds within 5 minutes. Standard phone keypads offer a painful 8 WPM, even after days of use.
- Buttons feel great -- large enough to read, easy to locate, and far enough apart to comfortably press. Button size and layout are perfect for touch screen phones too.
- Phones remain small & slim, the way people like them.
- At last - speedy, highly usable, single-hand operation phones smaller than a business card -- **Beautiful!**

Delta II™ Keypads. No Compromise.

“I tried the keypad and was able to get close to your stated times after just a few minutes.”

Donald A. Norman -- World Renowned Usability Expert

“Like a breath of fresh air in this industry.” “The typing speed was significantly higher than on a common cell phone and even the Treo.”

Wolfgang Gruener -- Managing Editor, Tom's Hardware/TG Daily

“Delta II drastically reduces the time from eyes-on, to decision making, to direct action when necessary.”
