

MY LINK

WIRELESS PHONE ACCESSORY

My Link is the accessory that I'm missing. And it's not just me. Up to 80% of women report missing calls to their mobile phones because they don't hear the ringer or feel the vibration when the phone is stashed in a purse.

My Link provides a wearable window to your phone (or phones) via a Bluetooth wireless connection. Not a speakerphone or headset, My Link alerts you to incoming calls and messages by any user-defined profile combination of blinking LED, ringtone and vibration. My Link also features a simple display showing incoming caller ID and received message count.

My Link is integrated with a strong clip that may be safely clipped to a purse, clothing, belt or strap, making it easily accessible no matter what you're wearing or carrying.

Use My Link in conjunction with a wireless headset for a completely hands-free mobile life.

Now you don't need to show off your phone in neighborhoods where you feel vulnerable. You don't need to fill a hand with your phone while dragging your suitcases through an airport, just so you'll know when your ride has arrived.

At Mobile World Congress, I carried my cell phone in my hand for three straight days. Never again!

READY. SET. GO.

Move My Link from purse to briefcase to jacket label effortlessly. Pair My Link with multiple phones, and you're always ready to go.

CLIPS AND GRIPS EVERYWHERE.

My Link does not damage clothing or accessories, is water resistant and viewable in strong daylight.

INTEGRATING MOBILE INTO YOUR LIFE

Never miss another call; leave your phone in your purse or pocket, and keep your hands free for everything else in your life.
